- D. Check the "Browse Only" property

---

Answer: A

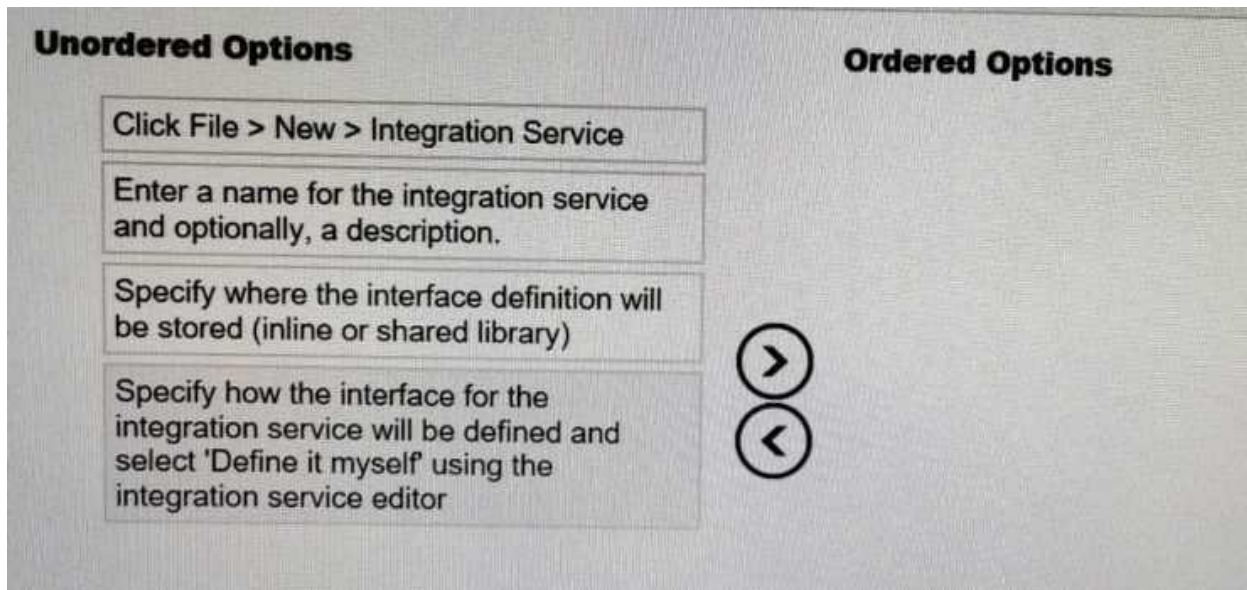

---

#### Question: 3

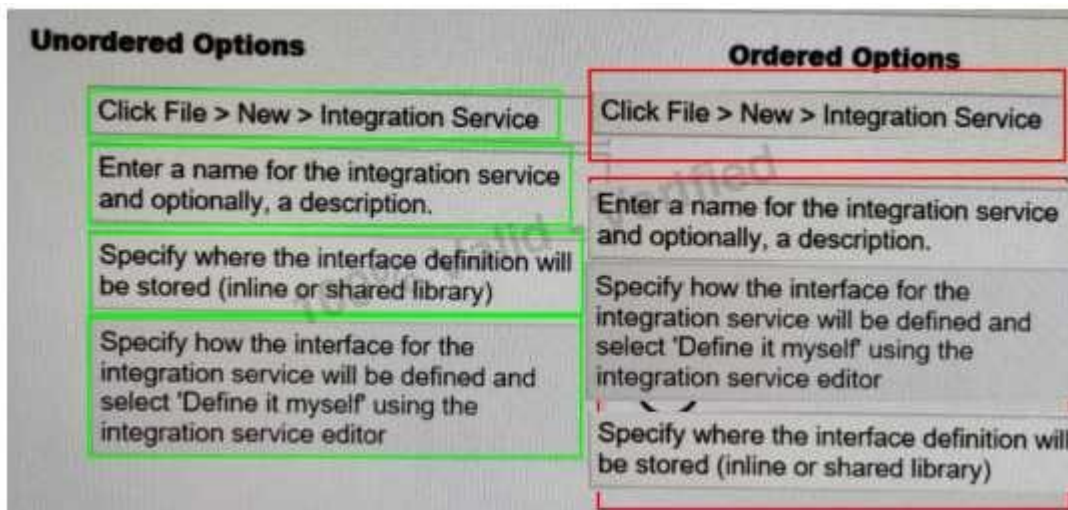

---

DRAG DROP

What is the correct order of steps to create an Integration Service from scratch?

Answer:

**Explanation:**

To create an integration service by defining a new interface, complete the following steps:

**Procedure**

- Open the New Integration Service wizard by using one of the following methods:
- Click File > New > Integration Service.
- In the Application Development view, click New > Start by creating an integration service.
- Right-click the white space of the Application Development view then click New > Integration Service.
- Enter a name for the integration service, and optionally a description.
- To specify how you want to define the interface for your integration service, select Define it myself using the integration service editor.
- Specify where you want to store your interface definition.
- If the definition will be used by this integration service only, store the definition in the integration service project.
- If the definition might be used by multiple integration services, store the definition in a shared library.

---

Question: 4

---

What is one reason to organize resources into applications?

- A. It enables all processes using the module to reference the latest versions
- B. It enables the ability to reference the resources in an Integration Project
- C. It allows for Java and ESQL support in the same message flow
- D. It provides runtime isolation of resources

---

Answer: D

---

---

**Question: 5**

---
